

Fraction Fringe Sets #1 & #2

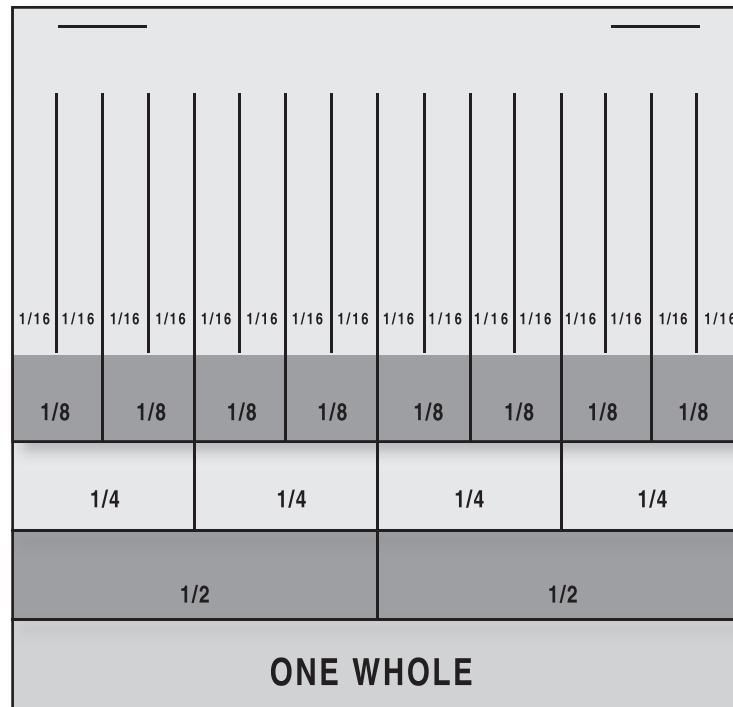

Figure A

1. Die-cut Fraction Fringe Set from cardstock or other paper using a different color for each Fraction piece.
2. The Fraction Fringe will be sturdier if the “One Whole” is die-cut from poster board. Laminate paper prior to cutting for a more durable manipulative.
3. Students should label the Fringe pieces as shown for Set #1, understanding that each piece equals one whole. Completed sets should be stapled.
4. Fraction Fringe Set #2 represents One Whole, Thirds, Sixths and Twelfths.

Note: Fraction Fringe Set #1 can also be used to represent liquid measurements (gallon, half gallons, quarts, pints and cups), musical counting for note value or genealogy (students, parents, grandparents, great-grandparents and great-great-grandparents).

If both sets are desired, save money by ordering Fraction Fringe Set #1 and individual dies for Thirds, Sixths and Twelfths (there is no need to have two Whole dies).

- Fraction Fringe also available individually: 15821 Whole, 15824 Half, 15830 Fourth, 15837 Eighth, 15843 Sixteenth, 15827 Third, 15833 Sixth, 15839 Twelfth
