The teacher will die-cut the materials for student use prior to the lesson.

1. Die-cut the Tree Pencil Pal out of green paper or cardstock.
2. Accordion fold on the perforations.
3. Thread a pencil through the holes, aligning the top of the tree with the tip of the pencil lead. It is designed to be a snug fit, so no glue is required.
4. Embellish the tree top with a tiny star if desired.
5. Poke the eraser end of the pencil through the hole in a spool of thread to help the tree stand up.
